Acting Chief, [REDACTED]

10 July 1959

Local Coordination

1. Receipt is acknowledged of your 25 June memorandum concerning local transmitter operations. A contact here from the transmitter group's headquarters virtually coincided with arrival of your memorandum. It added the new information that the first transmissions in hellschreiber are scheduled for about 20 July.

2. Our comment to them was that since this activity fell within the terms of an existing agreement, we are only insisting that full and prior coordination be accomplished. We requested that at least twenty-four hours notice be provided and that every attempt be made to avoid frequencies covered by [REDACTED]. They agreed to include these requirements in their authorization for inauguration of the activity.

3. From the information in your memorandum, it appears that your local contacts will consider our needs for coordination. If at any time the group fails to do so, hold to our position; do not hesitate to refer the matter to Headquarters if our coverage operation is jeopardized by laxity on their part. It is presumed that the control of hellschreiber intercept which the Bureau is able to maintain will cause this operation to give us less concern than the similar voice operations.
